

# Himes Ave Safety Improvements (from Kennedy Blvd to Columbus Dr.) Project #TBD

## Project Description:

The 1.5 mile segment of Himes Ave from Kennedy Blvd to Columbus Dr. is a 5-lane (two travel lanes in each direction and a two-way left-turn lane) Arterial roadway with a posted speed of 40 mph and serves the neighboring residential developments and commercial uses at the signalized intersections. Himes Avenue is a north/south roadway running parallel to Dale Mabry Hwy. In a review of city-wide fatal and incapacitating injury crashes from 2009 to 2011, this segment of roadway exhibited a cluster of 11 such crashes; therefore, this segment was analyzed for countermeasures to improve safety and to submit as a candidate for FDOT Highway Safety Improvement Program (HSIP) Off-System Funds.

Based on the geometrics of this roadway, the crash patterns, and field reviews, the recommendation is to replace the two-way left turn lane with raised separator islands, painted separators at turn lanes and dedicated bike lanes throughout the corridor.

## Location Map:

**Typical Concept Plan:**

**Typical Section:**

**Summary of Project Costs:**

Phase	Firm	Amount	Funding Source
Design	TBD	\$240,000	FDOT (TBD)
Construction	TBD	\$1,200,000	FDOT (TBD)
CEI	City	\$96,000	FDOT (TBD)

**Timeline:**

Public Meeting	June 5, 2014
Resubmit HSIP Funding Application to FDOT	June 13, 2014
FDOT Issues HSIP Project Notification Letters	Sep 12, 2014
Selected Projects Programmed in FDOT D7 WP	Jan 2015
Design	TBD
Right of Way Acquisition	N/A
Construction	TBD
